

ARCHITECTURE

INTERIOR DESIGN

PLANNING

P3Architecture is Southern Saskatchewan's leading design firm with a strong reputation for signature, sustainable Architecture and interior design. With offices in Regina and Saskatoon, P3A offers a full range of planning, design, and project management services in all sectors of the construction industry. This talented group of professionals has produced some of the most significant landmarks in the Province of Saskatchewan, including the RCMP Heritage Centre and the University of Regina Research and Innovation Centre.

P3A's philosophy is to assemble a cross-generational team of professionals that works together to ensure continuity and long term commitment to their clientele. This collaborative atmosphere ensures the firm is always innovative and facilitative in design of the built environment. Looking to build on their reputation for signature Architecture, P3A is searching for a:

Managing Architect, Saskatoon

As Managing Architect, you will lead the design development, construction documentation and construction administration of complex projects. Your thorough understanding of the project delivery process and your strong interpersonal skills will give you the ability to lead and coordinate large teams including Engineering disciplines, specialty consultants and internal project teams. A natural aptitude for marketing will allow you to effectively represent the firm to clients, public agencies and the community. In keeping with P3A's philosophy of knowledge transfer, you will train, mentor and challenge junior staff to explore the opportunities present in every project.

The successful candidate will have a Masters Degree in Architecture or equivalent professional degree and will be eligible for registration in the Province of Saskatchewan. Experience in the management and design of Architectural projects of varying types is mandatory, with preference being given to candidates with expertise in health care design. Demonstrated Marketing skill is essential, as P3A embarks on a renewed focus to grow the firm's business in Saskatoon and region. Proficiency with *Autodesk Revit Architecture* 3D modeling software will be favoured. Exceptional candidates should have a minimum of 5 years experience post-registration.

For more information about P3A, visit their website at www.p3arch.com.

This is an excellent opportunity for an Architect who wants to be part of an innovative, collaborative firm, and where becoming a Principal is a possibility sooner than later. For more information or to apply in confidence, please contact:
